ABSTRACT

The purpose of this travel website is to support offline customers online. They cannot spend their precious time in the market and find the best deals. The problems with existing travel sites were that they did not leave a lasting impression and that the relationship between travel agencies and customers was insufficient. Therefore, main goal is to build a relationship of trust by staying close to all our customers and providing them with timely service and website design and efficiency. Efforts are also being made to verify customer feedback. All beautiful places, both national and international, are also displayed properly.

ACKNOWLEDGEMENT

This project has been successfully completed with the contribution of group members. It gives us immense pleasure to thank various people who helped us with this project to be completed successfully. Project guide Prof. Priyanka Ghule has encouraged us to pursue our work but also initiated self-belief and confidence which helped the group members to take on the task of completing the project. She also kept us in track by conducting multiple reviews and submitting weekly progress report which led to completion of the project in given period of time.

INTRODUCTION

1.1 INTRODUCTION TO TRAVEL WEBSITE

Many businesses today need a website. Even if you run a travel business, word of mouth alone will not last long. Customers are interested in exploring each location on their own without the intervention of tour operators. Also, with the development of tech trends and the ever-expanding digital landscape, no travel agency can thrive without an online presence. That's probably why the web is flooded with travel sites. This travel website suggests some of the best places around the world. Everyone can find their favorite destinations, different locations in the city and costs individually. Best places to visit in this city will be shown. So, everyone can have a hassle-free trip without the need for a tour guide. Main goal was to make traveling easy and paperless. Intention was to change the traditional way of distributing brochures and manage and promote travel business digitally. So, the idea was to create a website that would minimize the human effort and hassle involved in booking travel.

1.2 MOTIVATION

Our main objective was to make the travel journey easy and paperless. We wanted to change the traditional way of spreading pamphlets for managing and advertising the travel business to digital. For that purpose, we had a thought of creating a website which minimizes human efforts and various problems which are involved in travel booking.

LITERATURE SURVEY

This section discusses the main research related to travel website as shown in the table.

All the literature papers are taken from google scholar.

NAME OF THE PAPER	WORK DONE	LINK OF THE GIVEN WEBSITE.
Veena World Website (www.veenaworld.com)	One stop website for International Travel.	www.veenaworld.com [3]
Swastik tours Website (www.swastiktours.com)	One stop website for mini-vacations in India.	www.swastiktours.com [4]
Club Mahindra Website (www.clubmahindra.com)	Famous for its lavish properties in almost every location in India and abroad.	www.clubmahindra.com [5]

Veena World Website

From Veena World Website we liked the features like colorful and attractive, A clean user experience with great transition effects, well organized. [3]

Swastik tours Website

From Swastik tours Website taught us that our website should have features like Apt use of animations, Minimalistic yet attractive, Easy to navigate. [4]

Club Mahindra Website

From Club Mahindra Website we tried to implement it features like Display of new resorts on top, Customer reviews and favorites, Video advertisements. [5]

We tried to replicate the features of the above websites in our websites to some extent. These websites gave us the gist of how a travel/tourism guidance website should be.

2.1 Survey of existing system:

In this project replication has been made and better and improved website of an existing travel company which is Swastik Tours and Travels has been done. This travel agency through their website provides travel services. They provide customized travel services in all directions, from Premium luxury hotels to Holiday packages, all of which cover both Domestic and International destinations. All of these packages are available on their website.

Though this website covers all requirements it still needs improvement to attract more customers and make its more user friendly. Thus, limitations are taken into considerations and an improved version has been made to make it more attractive as well as user friendly.

2.2 Limitations existing system or research gap:

Surveying the current website of Swastik Tours and Travels following things were lacking:

The website is difficult to traverse. There was no smooth traversal between different travel packages and tours listed on the website. Thus, it was difficult for the user to check out various plans. Therefore, links are added for every package and footer and top bar which directs it to the package information

Irresponsive hyperlink- Hyperlinks present on the website depicting various packages are irresponsive. Thus, added links are fixed which directs the page to the package details.

Blank hyperlinks- The gallery section of the website is a blank hyperlink which just simply reloads the website to the front home page. Gallery sections are added to make it user friendly.

Lack of animation-there is no animation on the website. Thus, to make it more attractive and fun to use various animations are added as use browse across the website

2.3 Problem Statement:

This travel site is a website through which users travel through all destinations. It provides a platform for booking domestic and international travel destinations. save time, secure, reliable, cheap and easy online booking. Can research various destinations and travel costs. Places of interest and photos in the city

2.4 Objectives:

This travel website provides a high standard of service suitable for those seeking a comfortable and unforgettable experience in the hospitality and tourism industry. Promote the tourism industry and discover the beauty of India and the world. Goal is to bring the travel industry to an online platform where users can easily and conveniently book travel destinations. Website navigation is easy and cost-effective. Easily find the best travel destinations. Working with reservations includes basic operations. Photos of sights and attractions in the city.

2.5 SCOPE:

Tourist groups can be used to manage their location and hotel details. Provide people with the right choice when planning their vacation. The website is easy to implement in a variety of situations

PROPOSED SYSTEM

3.1 Hardware and Software Requirements

Software:

1. Operating systems- ex.Window ,linux ,etc
2. Visual Studio Code for HTML,CSS,JavaScript.
3. Web browsers like Chrome, Firefox, Microsoft edge, etc.

Hardware:

A computer system particularly used for coding and programming.

CONCLUSION

This report has taken a survey of the tourism industry and analyzed its performance. This report is made possible by carefully gathering data from previous travel-related information from various sources.

Tourist Guidance will provide the users with lot of information through photos & reviews of other travelers.

Using our website, will provide you more efficient, more convenient & the best travel experience ever.
